Purpose

The *Data Quality Documentation, Discharge Abstract Database — Current-Year Information* report is produced on a yearly basis and provides information on the quality of the data file for the given fiscal year. An associated report, [Data Quality Documentation, Discharge Abstract Database — Multi-Year Information](#), provides background information to help users decide whether the data fits their needs. [Data Quality Documentation, Discharge Abstract Database — Glossary of Terms](#) is also available.

Information on how to complete the DAD abstract, including detailed data element descriptions and collection instructions, can be found in the [DAD Abstracting Manual](#). For a summary of the mandatory and optional DAD data elements, please refer to the [DAD Data Elements](#) document on CIHI's website.

Coverage

Levels of care and submissions, by province/territory

The DAD contains data on separations from acute inpatient institutions and selected day surgery, chronic, rehabilitation and psychiatric institutions. Data is collected on separations with a discharge date between April 1 and March 31 of the given fiscal year (see tables 1 to 4 in Appendix A).

- Submission of acute inpatient data to the DAD: Mandated by the provincial/territorial ministry/department of health in all provinces/territories except Quebec.
- Submission of day surgery data to the DAD: Mandated in all provinces/territories except Prince Edward Island, Nova Scotia, Quebec, Ontario and Alberta.
 - P.E.I., Nova Scotia, Ontario and Alberta continue to submit their day surgery data to NACRS, as in previous years.

Information about NACRS can be found on the [NACRS metadata page](#).

- Due to the impact of COVID-19 on hospitalizations and day surgery volumes in 2020–2021, caution is warranted when comparing trends.
- Quebec acute inpatient and day surgery data is submitted to CIHI via the ministère de la Santé et des Services sociaux du Québec. Information about the HMDB can be found on the [HMDB metadata page](#).
- Analysts are advised to use Analytical Institution Type Codes to identify acute inpatient and day surgery separations.

Changes to the number of reporting institutions

Throughout the fiscal year, facilities may open, close or merge, resulting in changes to the number of reporting institutions.

- Acute and day surgery Institution Numbers no longer valid in the DAD in 2020–2021: 2 institutions (stopped submitting to the DAD).
- New Institution Numbers in the DAD in 2020–2021: 13 institutions (1 from Newfoundland and Labrador, 2 from New Brunswick and 10 from Ontario).

Rate of over-coverage

- The rate of over-coverage from extra acute and day surgery abstracts in the DAD in 2020–2021 was 0.0005%. There were 8 acute care abstracts with duplicate records and 6 day surgery abstracts with duplicate records.

Rate of under-coverage

- There were no sources of under-coverage in the DAD in 2020–2021.

Non-response

Unit non-response refers to incomplete data that is submitted from institutions in the frame, whether at the institution or record level.

Unit non-response rate at the institution level, due to institutions that did not submit any data to CIHI for the entire fiscal year:

- Nil in the DAD in 2020–2021

Unit non-response rate at the record level, due to missing abstracts for all or some periods in the DAD in 2020–2021:

- For acute inpatient abstracts: 0.03%. This was because 2 facilities in Ontario did not submit data for 1 period (an estimated total of 115 and 70 missing abstracts, respectively), 1 facility in Ontario did not submit data for 2 periods (an estimated total of 60 missing abstracts) and 1 facility in Nunavut did not submit data for 3 periods (an estimated total of 451 missing abstracts) in 2020–2021. All facilities that had no separations to report submitted data files indicating 0 separations.
- For day surgery abstracts: 0.09%. This was because 1 facility in Nunavut did not submit data for 8 periods in 2020–2021 (an estimated total of 670 missing abstracts).

DAD fields

- Missing, invalid and unknown values in DAD fields for 2020–2021: See Table 5 in Appendix A.
- DAD fields evolution by fiscal year: See Appendix B.

Appendices

Appendix A: DAD data tables

The following tables are based on the population of reference for the current fiscal year, which includes all separations (except stillbirths and cadaveric donors) from acute inpatient care and day surgery institutions in all provinces and territories (except Quebec) between April 1 and March 31. Separations for day surgery for provinces and territories that submit to NACRS are not part of the DAD population of reference. The Analytical Institution Type Code was used to identify acute and day surgery institutions. The level of care of an institution may change over time due to hospital mergers or closures, or if CIHI's validation processes or analyses determine that it was previously incorrectly assigned. The totals reported in these tables reflect the levels of care recorded in the DAD at the time of database closure.

Table 1 Number of valid Institution Numbers* used to report separations in the DAD, by province/territory and Analytical Institution Type for the population of reference, 2020–2021

Submitting province/territory	Acute care	Day surgery	Total
N.L.	28	14	42
P.E.I.	6	n/a	6
N.S.	33	n/a	33
N.B.	20	19	39
Que.	n/a	n/a	n/a
Ont.	187	n/a	187
Man.	73	25	98
Sask.	62	21	83
Alta.	95	n/a	95
B.C.	83	60	143
Y.T.	3	1	4
N.W.T.	4	3	7
Nun.	1	1	2
Total	595	144	739

Notes

* Although there were 749 valid acute and day surgery Institution Numbers on the DAD frame, 739 acute and day surgery Institution Numbers were used to report separations to the DAD in 2020–2021. This is because 3 acute and 7 day surgery institutions had no separations to report in 2020–2021.

n/a: Not applicable (Quebec institutions and day surgery institutions in Prince Edward Island, Nova Scotia, Ontario and Alberta are not part of the DAD frame).

Table 3 Percentage change in volume of DAD abstracts between 2019–2020 and 2020–2021,* by province/territory and Analytical Institution Type for the population of reference

Submitting province/territory	Acute care	Day surgery	Total (%)
N.L.	-12.47	-20.65	-17.70
P.E.I.	-9.15	n/a	-9.15
N.S.	-9.39	n/a	-9.39
N.B.	-8.28	-10.59	-9.14
Que.	n/a	n/a	n/a
Ont.	-10.82	n/a	-10.82
Man.	-9.54	-21.89	-15.25
Sask.	-12.27	-20.88	-16.37
Alta.	-10.31	n/a	-10.31
B.C.	-6.37	-7.23	-6.81
Y.T.	-6.79	-2.36	-4.88
N.W.T.	5.14	5.71	5.36
Nun.	28.45 [†]	-71.02 [†]	-3.43 [†]
Total	-9.80	-12.67	-10.52

Notes

* Due to the impact of COVID-19 on hospitalizations and day surgery volumes in 2020–2021, caution is warranted when interpreting the percentage change in volume.

† The percentage change in Nunavut is partially caused by 1 facility that did not submit data for some periods in 2019–2020 and 2020–2021. This facility did not submit data for 6 periods (an estimated total of 1,100 missing abstracts) for acute care and 5 periods (an estimated total of 400 missing abstracts) for day surgery in 2019–2020, and for 3 periods (an estimated total of 451 missing abstracts) for acute care and 8 periods (an estimated total of 670 missing abstracts) for day surgery in 2020–2021.

n/a: Not applicable (Quebec institutions and day surgery institutions in Prince Edward Island, Nova Scotia, Ontario and Alberta are not part of the DAD frame).

Discharge Abstract Database, 2020–2021, Canadian Institute for Health Information.

Table 5 Number of acute care and day surgery abstracts submitted to the DAD with missing, invalid or unknown values in selected mandatory fields, 2020–2021

Data elements	Number of acute and day surgery abstracts with missing, invalid or unknown values	Percentage of acute and day surgery abstracts with missing, invalid or unknown values
HCN*	26,993	0.87
Province/Territory Issuing HCN	18,254	0.59
Postal Code [†]	94,743	3.05
Birthdate [‡]	11	<0.01
Admission Time	26	<0.01
Discharge Date	4	<0.01
Discharge Time	196	0.01
Most Responsible Diagnosis	9	<0.01
Principal Intervention	3	<0.01

Notes

* Invalid health card numbers (HCNs) are defined as those that are missing or unknown, those with invalid formats, those used for administrative purposes and not associated with an individual, those that are the same for a child and mother, and those associated with multiple-person demographic profiles.

† Invalid postal codes are defined as those that are not submitted, those that are invalid and those that are non-linkable (i.e., not in Statistics Canada's Postal Code Conversion File Plus [PCCF+] Version 7D, February 2021).

‡ Invalid and unknown dates of birth include the following:

- Birthdate of September 1, 9999; and
- Combination of Age Code U (*unknown*) and Age Units 0.
